TRADING IN STOCKS ON BROADER LINES

Although Volume Falls Under Recent Average Secondary Shares Bring About More Activity.

NEW YORK, March 19.—Although trading fell slightly under the recent daily average of 1,000,000 shares, the scope of the stock market today was broadened by the activity in numerous secondary specialties, particularly the fertilizer and food divisions.

Shipments held their promise of the previous session, of gains of 10 to 15 points, secondary specialties ranging from 10 to 20 points, followed by sugar, electrical, book, and other shares.

Auto, motor, industrial, alcohol, tobacco and several of the better secondary specialties were active and steady and raised their listing attitude. United States Steel fell a fraction and continued under pressure until the final hour when heavy buying effected a sharp rally to a net gain of 1 1/2.

Fluctuations of 1 to 4 points from top levels featured the later decline in the market, coinciding with an advance in gold money to 8 per cent, and withdrawal of bank loans, an irregular tone prevailing at the close.

Steadiness ruled in liberty and other domestic bond issues, foreign exchange steady, gold and coupon 2 1/2 per cent.
